SolarShield LX[®] Polarized WEAR OVER, Premium Post- Cataract Surgery Sunglasses

**ESSENTIAL EYEWEAR
FITS OVER PRESCRIPTION GLASSES**

ADVANCED UV PROTECTION™

Lenses block 100% of harmful UVA and UVB light. Patented design blocks 48% more light than conventional frames—especially important to Post-Cataract & other light sensitive patients.

THE PERFECT FIT

- Lightweight frames with BendToFit™ temples for a custom fit on specific models
- Twelve shapes to fit all prescription frames. Fits over Rx frames not exceeding:

- 127mm x 36 mm **Oval**
- 129mm x 35 mm **Tapered Rectangle**
- 130mm x 33 mm **Soft Rectangle**
- 131mm x 35 mm **Angled Rectangle**
- 131mm x 40 mm **Round**
- 133mm x 38 mm **Mod Rectangle**
- 134mm x 41 mm **Mod Rectangle**
- 135mm x 34 mm **Hard Rectangle**
- 137mm x 42 mm **Soft Bowtie**
- 138mm x 50 mm **Square**
- 139mm x 42 mm **Tapered Square**
- 141mm x 52 mm **Aviator**

Anterior Chamber Cannulas (also known as: Air Injection, Rycroft, and Viscoelastic Cannulas) The most popular are marked with an "*". To use the chart, select the desired gauge and length of angled tip, then record that catalog number. (For example, a 27g cannula with a 6mm angled tip would be catalog number 1001-6). The drawings at the top of each column depict actual length of the angled tip.

Anterior Chamber Cannulas have the following specifications:

- angle - 32°
- length - 22mm (7/8") PLEASE NOTE: 19g
- tumble polished tips for smoother radii

* Denotes most requested Thin Wall Anterior Chamber Cannulas.

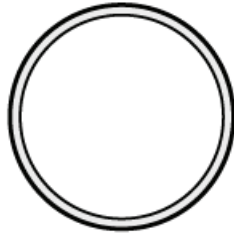

Thin Wall Anterior Chamber Cannulas (also known as: Air Injection, Rycroft, and Viscoelastic Cannulas)

The most popular have been marked with an "*". To use the chart, select the desired gauge and length of angled tip, then record that catalog number. (For example, a 25g thin wall cannula with a 6mm angled tip would be catalog number 2003-6). The drawings at the top of each column depict actual length of the angled tip.

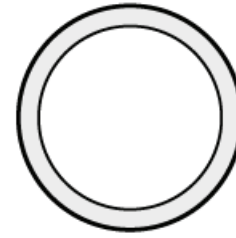

Thin Wall Anterior Chamber Cannulas have the following specifications:

- angle - 32°
- length - 22mm (7/8")
- tumble polished tips for smoother radii

Thin Wall

Regular Wall

1. Advantages to Thin Wall Cannulas:

The inside diameter is approximately 2 gauge sizes larger, therefore a 25g T.W. lumen is approximately the same as the inside lumen on a 23g (see illustration).

- Viscous materials flow through the cannulas with less effort.
- Thin Wall Cannulas allow the advantages of a larger bore through a smaller cannula.

Otological Ventilation Tubes: Sterile & BULK

SHEPARD

Classic, popular grommet design for easy insertion, adequate ventilation and short term duration.

Fluoroplastic

TE-7007-CE, 1.0mm I.D. With wire to facilitate easy removal

TE-7008-CE, 1.0mm I.D. Without wire

TE-7011-CE, 1.14mm I.D. With wire to facilitate easy removal

TE-7014-CE, 1.14mm I.D. Without wire

SHAH

Similar to SHEPARD design with extended tab or wire on outer flange to facilitate insertion. **Addition** of "Shoehorn" elongated tongue on inner flange allows smaller incision and easier insertion and helps prevent early extrusion.

Polyethylene

TE-7016-CE,
1.1mm I.D. With Tab

Fluoroplastic

TE-7018-CE,
1.1mm I.D. With Wire

**All Tubes available in
NON-STERILE, bulk packaged
at reduced prices**

DONALDSON

Popular ventilation tube due to its straightforward design which resists extrusion. **Silicone** material offers elasticity for easy insertion.

Silicone

TE-7024-CE, 1.1mm I.D. With tab to facilitate easy removal

TE-7025-CE, 1.14mm I.D. Without tab

5860-C Hollister Avenue

PAPARELLA Unique design of notched inner flange facilitates insertion through simple "twist-in" movement. **Very** stable for long-term implantation. Integral tab for removal with forceps. **Type Two** is a long-term design similar to the short-term Type One. It has large inner flange allowing easy placement and 1.5mm inner diameter to help prevent blockage.

Silicone

TE-7026-CE,
1.14mm I.D.
With integral tab

TE-7076-CE,
1.42mm I.D.
With integral tab

BEVEL BOBBIN

Fluoroplastic

Combining the best features of the Baxter Bevel Button and the Reuter Bobbin, the beveled shape resists occlusion and clears easily.

TE-7029-CE 1.14mm I.D.
Without wire

ARMSTRONG

Polyethylene

TE-7056-CE, 1.2mm I.D.
Grommet Type
Short Shaft

**All Tubes available in
NON-STERILE, bulk packaged
at reduced prices**

T-TUBE

Silicone

The T-flange and long shaft design keep the tube firmly positioned giving the surgeon complete control over length of ventilation time. **The** silicone material allows soft flanges to collapse easily for introduction through a very small incision and safe and comfortable removal at any time. **Can** be easily trimmed to adapt to the surgeon's needs.

MicroPick™ Ear Pick

PX-1000 MicroPick Straight Tip - 1 per pouch, 6 per box **STERILE**

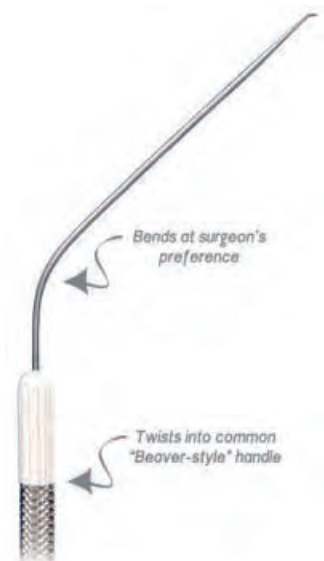

PX-1045 MicroPick Angled Tip, 45 deg. - 1 per pouch, 6 per box **STERILE**

PX-1090 MicroPick Angled Tip, 90 deg. - 1 per pouch, 6 per box **STERILE**

BL-1425 Stainless Steel Handle, non-sterile, multiple use

- Single-use, sterile, disposable ear pick tips for delicate procedures
- Molded adaptor fits into most myringotomy blade handles
- Malleable shaft bends to surgeon's preference
- Available in straight, 45 and 90 degree angles

Developed in cooperation with Dr. Jay Farior, the affordable, single-use MicroPick™ Ear Pick Tips feature three tip designs to ensure a new, precise tip for every procedure. The malleable shaft enables positioning in a nearly infinite number of angles to be fine tuned for surgical requirements. Each MicroPick Ear Pick Tip features a molded adaptor that can be threaded into Tecfen's Stainless Steel handle or most commonly used flat 'Beaver-style' myringotomy blade handles found on the market.

Eavey E3 Ear Wrap

SB-41400 Single Ear

Surgeon Features

- Time and money savings
- Adjustable
- One size fits all
- Use on either ear
- Change quick and easily
- Easily repositioned
- Easily replaced
- Used in combination with familiar cotton and gauze absorbent materials

Patient Features

- Extremely comfortable
- Safe sleeping
- Easily repositioned
- Easily replaced at home following surgical instructions

Surgical External Post-Operative Dressing

**Developed in conjunction with Roland D. Eavey, M.D.,
Massachusetts Eye & Ear Infirmary**

Instructions:

In the operating room, apply the conventional absorbent material such as cotton and gauze to the operated ear. Place the widest part over the operated ear and absorbent materials. Wrap the band around the head and use the velcro to secure. The wrap is placed at the same level one would have placed a conventional dressing.

Physician's Choice Head Bands

The majority of Otolaryngologists and Hearing Health Care Professionals in the U.S. believe that patients who wear ear protection, especially custom-molded protectors or preformed rubber ear plugs, should also wear a tight-fitting cap or band for extra protection when swimming or showering.

Use of the **PHYSICIANS' CHOICE** Headband is an effective, stylish, and comfortable way of keeping water out of the ears and ear protectors in place.

Available in a variety of colors and sizes:

SB-41206 SMALL Ages 18 months - 4 years

SB-41207 MEDIUM Ages 5 - 10 years

SB-41208 LARGE Ages 11 years - Adult

SB-41209 X-LARGE

Velcro closure allows easy adjustments

Comfortable fit

Fabricated from wet-suit neoprene material

Reversible - dual colored.

The **PHYSICIANS' CHOICE** Head Band is happily worn by boys and girls.

Nasal Sponges

AbsorbENT™ Nasal and Sinus Packing

We offer the most popular designs for nasal and sinus packing including Doyle Patient-Friendly Anatomic Nasal Packs. AbsorbENT™ Nasal and Sinus Packs consist of three-dimensional, interconnected open cells that are extremely soft and pliable. This interconnected structure produces packing that is exceptionally strong, highly absorbent and virtually lint and fiber free.

Soft, Absorbent, Lint and Fiber Free! AbsorbENT™ Nasal and Sinus Packs Feature

- Rounded edges for patient comfort during removal
- Even expansion for desired gentle mucosal pressure
- Rapid wicking of blood and fluid
- Individually sterile packaged

Nasal and Sinus Packing

AbsorbENT™ Nasal and Sinus Packs are compressed for easy placement. Upon exposure to fluids, the pack expands to six times its compressed size to fill the cavity and provide gentle pressure and support of tissues.

- Rounded edges for quick and easy insertion
- Even expansion for desired gentle mucosal pressure
- Rapid wicking of blood and fluid
- Individually sterile packaged

Doyle Patient Friendly™ Nasal Packs*

Doyle Patient-Friendly Nasal Packs are sterile, anatomically shaped, compressed AbsorbENT™ Sponges. The pack is precut from back to front except for a web at the distal end. The pack is inserted and functions like a standard anatomical nasal pack. On removal, the pack is pulled slightly out of the nasal cavity to expose the uncut web. The web is then cut through with

scissors, which separates the pack into two parts. The two parts are removed one at a time, greatly reducing patient discomfort.

Inserted into nasal fossa

Pull out slightly and cut through remaining web

Remove two parts one at a time

*Developed in cooperation with Donald Doyle, MD, FACS

Silicone Sheeting

Sterile, single-use

This medical-grade, custom-cut Silicone Sheeting is designed to be trimmed by the surgeon for custom applications.

Two thicknesses available: 1mm and 0.5mm

SP-65000 Silicone Sheeting 1mm x 56mm x 76mm
- 1 per package/10 per box

SP-65100 Silicone Sheeting 0.5mm x 56mm x 76mm
- 1 per package/10 per box

Epistax™ Balloon Catheter

- Made from soft, medical-grade silicone for patient comfort
- Beveled posterior tip and soft silicone construction allow for easy placement and prevents adhesion for easy removal
- Designed to control intranasal bleeding with a two-balloon epistaxis catheter:
- Small balloon controls posterior bleeding, large balloon controls anterior bleeding

The Epistax™ Epistaxis Balloon Catheter is available with or without an inflation syringe. The optional syringe is used to expand the balloons with normal saline. The volume of saline injected determines the size and pressure of the balloons, resulting in a controlled, uniform pressure to manage bleeding. The integral airway tube allows for nasal breathing while the balloons are inflated.

EPISTAXIS CATHETER WITH INTEGRAL AIRWAY

RH-4200-01 97mm Double Balloon - 1 per package, 1 per box

RH-4220-01 97mm Double Balloon with 20cc syringe, 1 per package, 1 per box

DeVilbiss® Atomizers and Tips

Use convenient, single-use RhinoGuard™ Tip Covers on your DeVilbiss products to reduce cross contamination, increase comfort for your patients and eliminate the need to decontaminate products over and over.

ATOMIZER

Ultra-fine particle atomization of most medical solutions

Straight flow tip is easily disassembled for cleaning

Suitable for applying fine, medicated spray to nasal and oral cavities, or oral vaccines

May be used with compressed air, the No.1 bulb or No. 630 cut-off assembly

Model DV-286

Atomizer, clear glass with metal top
1 per package/non-sterile

ATOMIZER

Designed for quick change and replacement of spray tube

Tight fitting "O" ring ensures consistent spray

Metal spray tube may be sterilized after each use

Adjustable tip permits up or down spray for aqueous solutions of heavier viscosity

Operated by the No.630 cutoff assembly or a No. 1 bulb

Model DV-163

Atomizer, amber glass with metal top
1 per package/non-sterile

RHINO-GUARD ATOMIZER TIP PROTECT

SP-30010 100 per box/non-sterile

SP-30250 250 per box/non-sterile

Thermometer, Digital Forehead Liquid Crystal

Guardian Liquid Crystal Thermometer

Precise display of body temperature is indicated in 1/2 degree temperature increments. Within 15 seconds the core temperature of the individual is indicated in easy-to-read windows.

- Does not break
- Available in Celcius or Fahrenheit
- Indicates temperature in 15 seconds
- Save, no risk of Mercury spillage

Packaged separately: Digital Thermometer + Instruction Sheet* + Plastic Sleeve

*English/Spanish

Celcius

Dual Fahrenheit/Celcius

EASY TO USE:

1. Make sure the forehead is clean and dry.
2. Firmly apply onto the middle of the forehead, holding it at both ends, without touching numbers.
3. Wait until colors stop changing, usually 15-20 seconds.
4. READ THE GREEN COLOR ONLY. Disregard Blue and Tan colors.

What are Liquid crystals? They are the most thermally sensitive materials known, possessing a unique state of matter: the optical properties of both liquids and crystals. The colorful diffracting liquid crystals are cholesteric esters which change colors when their molecules, which are in a spiral structural form, are caused to change due to temperature variations. Such molecular movement results in visible color shifts which are evident to the eye.

Research has shown that forehead temperatures closely follow internal, or "core" temperature movements. The central forehead is notably free of fat or obscuring and insulating tissue masses. Digital thermometers when placed on the forehead correspond directly to core temperature variations. Measuring from the surface allows you to quickly and easily determine any temperature trends.

CE

Provita Smoke Hood

Provides 20 vital minutes of life-saving evacuation time.

**Rubber seal at neck
One size fits all**

Proven to protect from smoke and 98% of toxins created by fire, including:

**Chlorine | Ammonia | Acrolein
Hydrogen chloride | Hydrogen sulfide**

**Lightweight and Compact
Wt. 6 oz
8" x 6" x 1" package size
Vacuum sealed**

**Gas-impermeable charcoal filter
Transparent, heat-resistant Kapton®**

"80% of those who die do so following incapacitation through breathing in smoke and toxic fumes during their attempts to escape, rather than from the flames from the fire itself"

- Parliamentary Advisory Council for Transport Safety

"An unscheduled landing of a commercial aircraft on average more than once a week" in the United States due to smoke and/or fire situations. Survival in a critical fire situation has depended until now on getting out fast."

- FAA Statistics report

1. Smoke Hood easily comes out of its 8"x6"x1" vacuum sealed bag — ready for use in seconds.

2. There is no front or back. The Smoke Hood can be put on quickly for panic situations.

3. The rubber seal easily slips over your head and seals — not allowing any smoke through.

4. The Smoke Hood provides 360 Degree vision and 20 vital minutes to escape a smoke filled room.
