Ophthalmic Knives and Blades

Precision instruments available in a range of popular blade sizes and geometries

Tecfen Ophthalmic knives provide a “Controlled Cut”, providing the surgeon with the perfect combination of sharpness and control. This gives the surgeon the optimal amount of tactile feedback necessary when performing procedures.

The following is a collection of our most popular knives. Other sizes and models available by request.

Stab Knives

PRODUCT NO.	DESCRIPTION	QTY PER BOX
QKN1501	15 Degree Stab Knife	6/Box
QKN1531	15 Degree Stab Knife 3 mm Restricted Depth	6/Box

PRODUCT NO.	DESCRIPTION	QTY PER BOX
QKN1551	15 Degree Stab Knife 5mm Restricted Depth	6/Box
QKN3001	30 Degree Stab Knife	6/Box
QKN4501	45 Degree Stab Knife	6/Box

Slit Knives

PRODUCT NO.	DESCRIPTION	QTY PER BOX
QKN2261	2.2 mm Slit Knife Angled	6/Box

TE-0024	19g X 25mm X 1" 7mm angled tip, tri port	10/Box
TE-0027S	Rous 25g X 16mm X 5/8" Extra Sharp curved, bevel down	10/Box

Anterior Chamber Cannulas

Anterior Chamber Cannulas (also known as: Air Injection, Rycroft, and Viscoelastic Cannulas) The most popular are marked with an "*" . To use the chart, select the desired gauge and length of angled tip, then record that catalog number. (For example, a 27g cannula with a 6mm angled tip would be catalog number 1001-6). The drawings at the top of each column depict actual length of the angled tip.

	3mm	4mm	5mm	6mm	7mm	8mm	9mm	10mm	11mm	12mm
30g	1000-3	1000-4*	1000-5	1000-6*	1000-7	1000-8	1000-9	1000-10	1000-11	1000-12

Ophthalmic Cannulas

Full range of single use cannula instruments

Thin Wall Anterior Chamber Cannulas (also known as: Air Injection, Rycroft, and Viscoelastic Cannulas) offer several advantages over regular wall cannulas.

ADVANTAGES TO THIN WALL CANNULAS

- The inside diameter is approximately 2 gauge sizes larger, therefore a 25 g. T.W. Lumen is approximately the same as the inside lumen on a 23g (see illustration)
- Viscous materials flow through the cannula with less effort
- Thin Wall Cannulas allow the advantages of a large bore through a smaller cannula

The most popular have been marked with an “*”. To use the chart, select the desired gauge and length of angled tip, then record that catalog number. (For example, a 25g thin wall cannula with a 6mm angled tip would be catalog number 2003-6). The drawings at the top of each column depict actual length of the angled tip.

Ophthalmic Surgery Drapes

Patient drapes specifically designed for ophthalmic procedures

Our ophthalmic surgical drapes are manufactured to the highest standards using latex-free materials in the USA. The matte finish on the drapes produces little glare during surgery, while the adhesive reliably secures the drape to the patient's skin. The free-flowing design allows the drape to contour to the patient's form, allowing for an easier surgical process.
